

# Galaxy Cloud Managed Services

Cloud services and other hosted applications in the physical security market have gone mainstream for good reason. The advantages of cost savings, flexibility and future-proofing as well a reduced environmental impact are beneficial to a wide range of users and budgets.

Now, Galaxy Control Systems delivers even more value with a Cloud Managed Services model that delivers an end-to-end hosted and monitored access control solution. With this solution, users can focus time and energy on their core business and not worry about software updates, system integration or allocating resources. It's all managed – seamlessly and efficiently. The benefits are amplified by the knowledge that each facility is safer and more secure with real-time managed access and monitoring.

Comprising the services of a team of industry professionals, the Cloud Managed Services hosted access control solution is designed to provide all the benefits of a locally managed system but without the need to take responsibility for, and incur the expense of, maintaining on-site hardware. The complete turnkey access control solution

is installed by a participating Galaxy Control authorized reseller. It includes professional 24/7 management and supports industry standard access technologies to deliver a range of services that enable real-time management.

Managed Services are one more way that Galaxy is demonstrating our commitment to providing the best service in the industry. Our customers always come first.
